

"If I had my life to live over again, I'd be a plumber." - Albert Einstein

Monthly Meeting

November 6th

Speaker: Kathleen McClanahan

Presentation Title: ST108 Evolving Standards for Central Sterilization

Location: Tanners Bar and Grill (1202 S 119th St, Omaha, NE 68144)

Time: 12:00 PM

[Google Link](#)

- Lunch is sponsored

- CEUs are available

Please click this link to register for the meeting:

Upcoming Events

November 6th - Culligan

December 4th - Soderholm and Associates - Controlling Legionella and Other Waterborne Pathogens

January - No Meeting!

Design Tip

CHSPACE

On a layout, this command transfers the selected objects between model space and paper space and automatically scales them to maintain the same "look" in paper space.

Fun Fact

In 1652, Boston was the first US city to install pipes to deliver water for firefighting and domestic use to inhabited portions of the city. Water lines were often made from hollowed-out trees, and the trees natural shape determined where the waterlines went.

Messages from the Board

Message from President

Hello ASPE Omaha!

November is traditionally a month for giving thanks.

To our chapter members: Thank you for being here. Even if you are far from Omaha and unable to attend meetings, we are thankful for you being a part of our chapter. The board is constantly thinking about how our actions impact the chapter and the members we serve. It's always a pleasure to see you at meetings, and it's exciting to see our members advance in their professional careers. Many of you help out with events or provide speakers for our monthly meetings and we truly appreciate you. This chapter would not be successful without each of you.

To the board members: You guys are just incredible! The amount of time and dedication you each give to make this chapter successful is truly inspiring. From planning the presidents meeting and the golf outing this year to showing up and helping run monthly meetings and support our chapter members you guys make this chapter successful. I am truly honored to part a part of the tremendous things you all do each day. I want to thank our current board members (Matt, Mike, Josh, Marko and Scott) for all of your hard work and dedication and say thank you to our past Board Members and Presidents for building this chapter.

I hope you each enjoy a happy and healthy Thanksgiving, and some great time with family and friends, or whoever brings you joy.

We are down to our last two meetings of 2025, and I know Matt has some incredible meetings planned for you. If you haven't been able to attend a meeting yet this year now is a fantastic time to come out and have lunch. We look forward to seeing you.

See Matt's VP tech article for more information about our upcoming meetings.

Respectfully submitted:

Kristy Leddy

Omaha Chapter ASPE President

kleddy@alvine.com

Message from Adm. Assistant

Sounds like the members are pleased with the Newsletter so I will do my best to keep it up to date with useful info.

Marko Butsyak, EIT, CPD

Message from VP Technical

Hello ASPE Omaha

Our next meeting will be Thursday, November 6th at Tanners Bar and Grill; 1202 S 119th St, meeting starts at 12:00. Kathleen McClanahan with Culligan will be discussing "ST108 Evolving Standards for Central Sterilization" Kathleen has graciously sponsored the lunch. Thank you very much!!

Visit our new website at ASPE - Omaha Chapter - Home Page (aspeomaha.org). Use the website to register and pay for the upcoming meeting.

Upcoming schedule for 2025-2026:

December 4th – Soderholm and Associates - Controlling Legionella and Other Waterborne Pathogens

January – No meeting!

Please let me know If you would like to present, or if you know someone who would. I would like to remind all potential speakers/presenters that if you choose to do a presentation, we ask that you do a presentation that is as non-proprietary as possible. We very much appreciate your cooperation with this. This will help us keep in-line with the policies that have been set in-place by Society.

Thank you,
Matthew Obst

Charlotte Pipe Edge HP Iron™ for Aggressive DWV Applications

Charlotte Pipe and Foundry's new Edge HP Iron pipe and fittings system is a specially coated cast iron designed for aggressive DWV applications. While Charlotte Pipe's standard cast iron systems easily meet the needs of the vast majority of DWV installations, in certain aggressive environments, the piping system may need enhanced protection.

Charlotte Pipe Edge HP Iron is specifically designed for aggressive applications and installations such as:

- Exposure to undiluted cleaning chemicals with a pH range of 2 to 12
- Hospitals
- Casinos
- Commercial kitchens
- Soda fountains
- Bar sinks
- Parking garages

PERFORMANCE

Charlotte Pipe Edge HP Iron™ meets or exceeds all of the coating performance requirements found within EN 877. This system also conforms to ASTM A 74 (Service and Extra Heavy), ASTM A 888 and CISPI 301 (Hubless) standards. It is certified by NSF International as conforming with all performance and quality control requirements of the standards listed above.

EDGE HP IRON™ LINE INCLUDES:

- 2"-15" NH and SV pipe in 10' lengths
- More than 560 SKUs of 2"-15" NH, SV and XH fittings
- For use in aggressive drain, waste and vent (DWV) and storm drainage applications
- Not suitable for chemical waste applications
- NSF International and IAPMO listed
- Charlotte Pipe's pipe and fittings must be joined with NSF-listed couplings and neoprene gaskets

Introducing the Cyclone® LV

The A. O. Smith Cyclone® family of commercial water heaters is now bigger and better with the addition of the new Cyclone LV. This is the largest model available in what is the most specified family of high-efficiency commercial water heaters in the industry. Cutting-edge technology and a larger storage tank compared to other Cyclone models allow the Cyclone LV to meet most critical load requirements—and that's a big deal, literally.

Up to 96% Thermal Efficiency

Eric's Sons
MANUFACTURING

Providing the Plumbing Industry with Custom made Drainage Solutions since 1968

- Standard widths are 2", 4", 6", 8", 10", 12", 18", 24", 36" & 48"
- Custom widths available
- Custom depths from 2" deep to 96" deep
- Standard lengths are 8' long for quick installation!
- Custom lengths available
- Standard continuous internal .5% slope
- Custom slope available
- Available in choice of vee-bottom or square-bottom
- Choice of T304 or T316 stainless steel
- Choice of stainless steel gauge: 18, 16, 14, 12, 11, 10, & 7 gauge
- Factory-welded turns and tees. No more field-fabrications!
- Cut installation crew and time by more than 100% *

WOODFORD MODEL 67 FREEZELESS WALL HYDRANT: BEST SELLERS.

Woodford 67 series are the best-selling commercial wall hydrants in the nation. With good reason.

They drain automatically, even with a hose attached. They're high flow and maintenance-free. They have fewer parts to wear out than competitive hydrants. And they won't freeze.

They're guaranteed for five years. They set the standard other faucets can only hope to reach.

Oil Minder® Has Your BAC

BACnet, that is. But Oil Minder® offers so much more. Plumbing engineers can implement newfound reliability while improving operational efficiencies and maintenance practices through Building Automation System (BAS)/Building Management System (BMS). Oil Minder® makes it possible to exceed customer expectations.

STANDARD OIL MINDER®

The integrated pump-and-control system includes two dry contacts (oil fault and high-water alarm). Those messages can be incorporated into BAS/BMS. Additional dry contacts can be added for even more functionality.

OIL MINDER® BACnet

Oil Minder® offers an integrated hardware/software solution to work with any BACnet protocol. The standard BACnet offering provide messages: oil fault, high-water alarm and pump run status.
